A new canal, started during World war II, which will connect not: chemical plants
with the already existing Gliwice Canal. The excavation for this canal is already
completed; other works on the canal are progressing.

- 2. Military barracks at Kozle. A detachment of infantry (probably one battalion) and an : antitank unit are stationed there.
- 3. Cotton warehouse located in the former paper mill Zellstoff Fabrik Cosel (Kozle). A small amount of wool is also stored there. The original plant buildings were partly destroyed during World War II. About 50 workers are employed at this warehouse.
- 4. Flant producing fuses for hand grenades. Located in the former Danz Foundry. Employs 50 to 75 workers.
- 5. Iron scrap store.
- 6. Shippard at Januszowice. Hulls for tugs of 250 HP are being constructed here.
- 7. Shiryard at Rogow where barges are being remained.
- 8. The office building and prison of the UB (security Police). The prison serves for political prisoners.
- 9. Oder River port at Kosla.
- 10. Polish and Czech repair workshops for vessels sailing on the Oder.
- 11. Grain and goods warehouses located on the eastern query of the port of Korle.
- 12. New loading cranes, each of seven-ton capacity, located on the western coal quay of the port of Kozle.
- 13. Glue and chemicals plant for the cosmetic industry, located in the Tormer 'potato flakes' factory. It employs 40 to 50 workers.
- 14. Stallion stud farm.
- 15. Two bridges over the Oder River at Rosle. 7
- The nitrogen chemical plant at Kedaiersyn near Kosle (Zaklady Asot Kedaiersyn) is being rebuilt on the site of the former German chemical plant which was a branch of IQ Farben. This plant was built in 1934-35. It suffered little damage during World war II, but in 1949 it was completely dismantled by the Seviet sutherities. Certain parts of buildings and some installations which could not be dismantled, eg. pipes, were blown up. Other chemical plants in the area were also dismantled, eg. plants at Slachownia, Zdzieszowice and Chrapkowice.

The site of the Kedsiersyn plant, which is located in the forest, stratches along the railway line Racibors-Opole (from the West) and between the railway line Kosle-Gliwice (from the North) and the highway Stare kesle - Ortowice (from the Bouth). The reconstruction work, both on buildings and installation is in full progress June 1953.

Only a small section of the plant p the oxygen producing department (mainly for reconstruction purposes) and a wax producing plant are in operation.
